Are you Up-To-Date?

Are you using the latest version of FlashPoints?

The current version of FlashPoints is:

1.9.2.0

If you don't see this version number at the top of your screen when you run FlashPoints, please contact Flash-Soft support.

Please update all of your computers to this version of FlashPoints at your earliest convenience.

Welcome to the latest edition of Flash News, a newsletter dedicated to bringing you news, information, tips, and hints for getting the most out of FlashPoints.

Don't have FlashPoints yet? Try a FREE DEMO today!

Flash-Soft is going green!

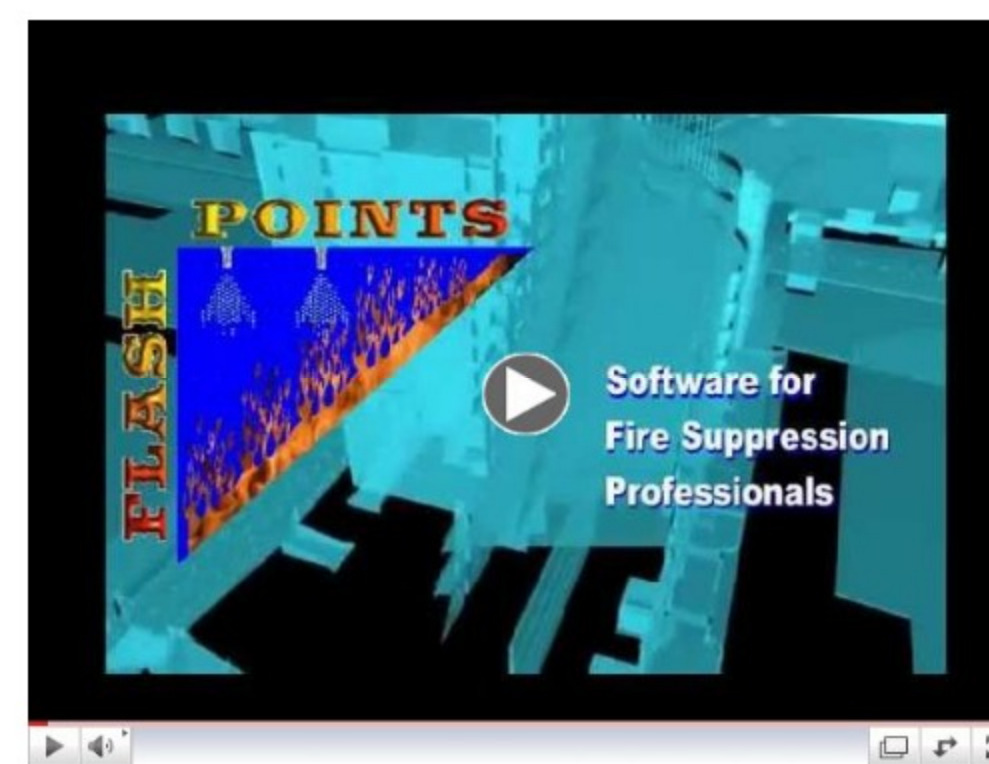

As some of you may have already noticed, effective immediately, Flash-Soft will no longer be mailing out support invoices via the US Postal Service. Instead all invoices will be sent out via email. Please make sure we have your latest email address on file so that your service will not be interrupted.

Thank you for helping us save the environment and make our invoicing process more efficient.

FlashPoints improves Scaling

The latest version of FlashPoints features new improved scaling. Now when the scale bar is used to reduce or enlarge the items on a drawing, the drawing stays together. This means the appliances do not float away from one another and do not need to be repositioned after scaling.

The new scaling makes it faster and easier to create professional drawings.

Move around the Canvas

How many times has this happened to you? You've just finished laying out a kitchen. The hood, ducts, and appliances are just where you want them. Now you have to add a door to the drawing. There is plenty of room on the right side of the Canvas, but the door needs to go on the left side and there is not enough room!

It used to be that your only option was to drag each object in the drawing to the right and reassemble the drawing.

Now you can move the entire drawing to any place on the Canvas with a single mouse click. Simply CLICK on an empty space on the Canvas and the mouse cursor will change to a cross with four arrows. Hold the mouse button down and drag the mouse. Your entire drawing will move around the Canvas to anywhere you choose.

If you get a little crazy and move the picture off the Canvas, it is a simple matter to return the drawing to the Canvas. Click the VIEW menu at the top of the screen. Then select REFRAME DRAWING. Your drawing will magically appear in the upper left corner of the Canvas and can be moved around as needed.

New FlashPoints Pricing is a Hit!

It is now easier than ever to get your company up and running with FlashPoints. Our new pricing is simple and more affordable. A single FlashPoints license and at least one FlashKey are all that is required to get going right away. FlashPoints licenses are \$500 per customer location. Purchase as many FlashKeys as you need for just \$300 each. Each FlashKey is for a single manufacturer and unlocks one computer at a time.

This is a great time for current FlashPoints customers to add additional FlashKeys at just \$300 each!
