FlashPoints Announcement

Personalize your FlashPoints drawings

Put your company logo on your FlashPoints drawings and reports. To set up your logo simply go to the Preferences screen, which is located on the Edit menu. Choose the Logo tab. Click the BROWSE button to select the file containing your logo and press the SAVE button.

That's all there is to it! Your logo will now replace the FlashPoints logo on drawings and reports. If you want to turn off your drawing and display the FlashPoints logo, just click the box on the Preferences | Logo tab that says "Print the FlashPoints logo". Your logo will be replace with the FlashPoints logo.

If you select a file that is not a valid graphic file or if the file does not exist, FlashPoints will display a message and print the FlashPoints logo on your reports.

Updates & Improvements

The latest update of FlashPoints fixes a couple of bugs and brings some new features. The next time you run FlashPoints the update will begin automatically.

Please remember to turn off your anti-virus software so it will not interfere with the update. Turn your virus protection back on after the update is complete.

Version 2.0.2.3

Make sure you are up to date. The latest version of FlashPoints is Version 2.0.2.3.

Update Today!

Spread the word!
Tell your Fire Marshals and Inspectors that there are editions of FlashPoints available to help them work faster, too!

See you at the show!
Stop by and let us show you the newest FlashPoints features, in person, at the NAFED conferences in Atlantic City, New Jersey and Indianapolis, Indiana.
