

UPGRADE to the newest FlashPoints!

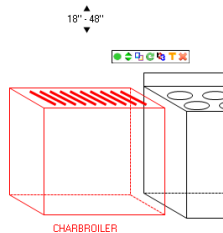

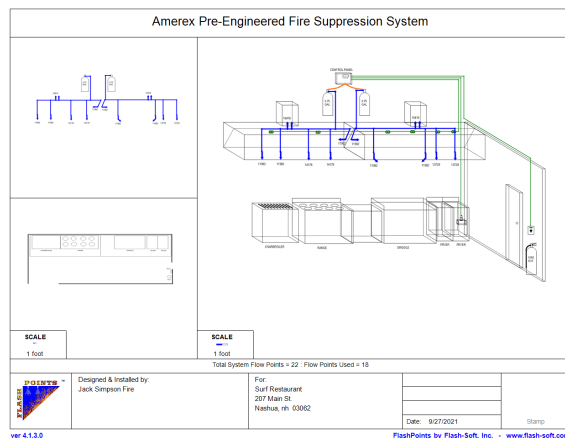

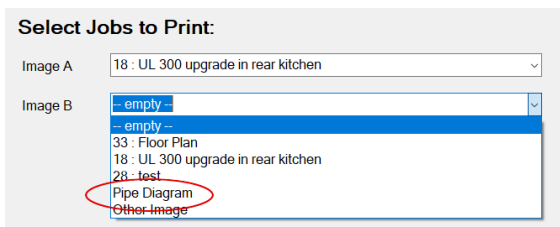

Version 4.1.3.0 is available to download.

A new version of FlashPoints is ready for you to download. Click the link below to get version 4.1.3.0 today. This is a very important upgrade, it turns the automatic backup back on, brings back the ability of FlashPoints to automatically install future updates, and adds several new features and fixes.

[Get version 4.1.3.0](#)

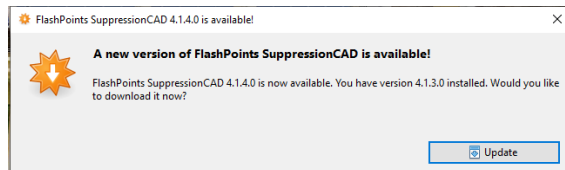

Instantly create Pipe Diagrams

FlashPoints can now draw Pipe Diagrams without any additional effort and at no additional cost. Simply choose the Pipe Diagram option on the Print Setup screen and FlashPoints does the rest

Display Nozzle Heights Separately

Nozzle heights can now be drawn independently of nozzles. This allows nozzle heights with manually added nozzles.

Automatic UPDATE is Back!

Going forward, FlashPoints will be able to see new updates, again, and will download and install them with the click of a button.
