FlashPoints Remote Training

(for FlashPoints Customers, only)

Tuesdays @ 10 am ET

Fridays @ 1 pm ET

Signup to request an invitation to a class at www.flash-soft.com.

Even customers who have been using FlashPoints for years are encouraged to take the class to learn the latest FlashPoints tips, tricks, and features.

Fire protection systems **since 1949**

Flash-Soft welcomes Lehavot!

Flash-Soft is very pleased to announce our new partnership with Lehavot. In case you are unfamiliar with Lehavot, they are a fire equipment manufacturer from Israel who have been around for over 70 years. Lehavot's KitchenShield suppression system for restaurant kitchens is UL300 listed, is recognized around the world, and has been expanding into the US market.

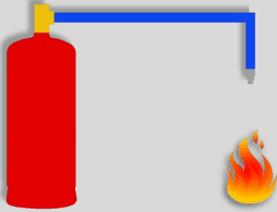

Several FlashPoints customers are already Lehavot distributors so it only made sense for us to partner with Lehavot and make drawing Lehavot systems as easy as it is to draw all other systems with FlashPoints.

As we have done, through our partnership with Amerex, FlashPoints is now branded for Lehavot distributors to let them know that we are working directly with Lehavot to provide them with the best drawing experience possible. Spec Sheets for both Amerex and Lehavot are also available for print, as needed, with just a couple of mouse clicks.

It is an honor for Flash-Soft to now be partnered with Lehavot and Amerex.

Please,
UPDATE TO VERSION 4.1.5.0, NOW!

Turn off Automatic Protection

Take control of how FlashPoints protects equipment

By default, FlashPoints attempts to place nozzles above or in appliances, hoods, and ducts. This is a convenience that is designed to speed the user through making a drawing as quickly as possible. But at times this can also be an inconvenience.

Take for example, a large industrial application, FlashPoints will place area nozzles to cover the entire room. But if perimeter protection is preferred it means that each of the area nozzles will need to be deleted. Deleting 20 or 30 nozzles can be very time consuming. Add to that the possibility that the room might be moved or resize; bringing all those nozzles back again!

A button to toggle the automatic protection off and on has been added to the Minibar of each appliance, duct, hood, and space. Simply select the item, click the button on the Minibar and FlashPoints will not provide the default protection. In fact, FlashPoints will remember that the protection is turned off and will keep it off, even if the item is moved or resized.

To add your own coverage to the drawing, simply click the nozzle button and place the nozzles where you need them.

Quoting for Multiple Jurisdictions

Changing Sales Tax Rates

Ever since the first version of FlashPoints was created, it has always had the ability to cost and quote jobs. A part of the quoting process is setting the Sales Tax rate to be applied to the price of the job. The sales tax is set by entering it in the Preferences window.

But this can be a problem for FlashPoints customers who have to deal with multiple jurisdictions that each have different sales tax rates. Until now the rate had to be changed in the Preferences window for each job, which

	Taxable:	4181.07
	NonTaxable:	3800.00
Tax Labor <input type="checkbox"/>	6.25 % Sales Tax:	261.32
	Total:	8242.39

Sales Tax rate on the Preferences page now serves as a default rate (use this as your most common rate). Then, simply click in the box containing the Sales Tax percent, on the Requirements page, and type a different rate. The rate in the Sales Tax percent field is saved with the Job so that FlashPoints will be able to bring it back each time you work on the Job. To return to the default Sales Tax

would then change the price of all jobs in FlashPoints.

Version 4.1.5.0 leverages the method used to allow prices to be changed and saved to allow the Sales Tax rate to be changed. The

percent, clear the Sales Tax percent box and press ENTER; FlashPoints will look up the default Sales Tax percent and will use it immediately.

FlashPoints Referral Program

**As you refer FlashPoints to your friends,
remember to give them your FlashPoints referral code.**

**When they get FlashPoints,
they will get 2 extra credits and you will get 2 credits, also!**

**If you don't have your FlashPoints referral code,
send an email to support@flash-soft.com and we will send it to you.**
