FlashPoints Remote Training
(for FlashPoints Customers, only)

Tuesdays @ 10 am ET
Fridays @ 1 pm ET

Free Beginner and Industrial Training
are available

Signup to request an invitation to a
class at:
www.flash-soft.com/training.php

All customers who have been using
FlashPoints for years are encouraged
to take the class to learn the latest
FlashPoints tips, tricks, and features.

**Don't Forget to ENHANCE your
FlashPoints experience with
FlashPoints Survey!**

**Available in the FlashPoints
Store**

A New Dimension

Customer suggestions are very important to us. That's why we love to hear from our customers and we listen to what they have to say. The latest update (Version 4.7.0.0) includes new features that our customers have suggested.

One of those new features, described below, is the ability to move the dimension indicators. These indicators have always seemed odd to us and we still recommend that dimensions be typed into the appliance label for cleaner drawings. But if dimension indicators are really desired, at least they can be moved now. Read all about it below.

If you have a suggestion or comment about FlashPoints, give us a shout. We are listening.

Denis & Ray

UPDATE TO VERSION 4.7.0.0, NOW!

Drawing Link Brackets

If you are a minimalist, like me, showing a fusible link as two circles on a drawing is just fine. But sometimes you might want to dress it up a little and show the bracket around the link. We have added a new button to the fusible link Minibar that does just that. You can now toggle a link bracket off and on for each fusible link on your drawing.

Moving Dimension Indicators

Dimension indicators first appeared in FlashPoints over 9 years ago. A customer had asked for a way to indicate the length of each side on the drawing. However, after we added them to FlashPoints it quickly became obvious that this was a recipe for disaster. If the dimension indicators are turned on for all appliances, the drawing looks horrible. The dimension overlap with other appliances and become unreadable. For that reason we have always recommended that a better solution is to put the dimensions in the appliance label. That way the dimensions will appear next to the label and can be moved with the label, giving drawings

a sleek, clean appearance.

But sometimes it is preferable to show dimensions along the sides of an appliance. The dimensions can always be toggled on and off on the Minibar. They are displayed in the center of the side to which they apply and have been unmoveable.... until now!

You can now click on the dimensions and drag them to move them, just as you can move the appliance label. If the label displays at the same place as a duct or if a detection line runs through it, simply drag it to a more visible location. Limits have been applied to prevent the labels from going astray, but we think this makes the dimension indicators a little more useful.

THANK YOU to Casey Perry at Code-3 Fire & Safety Products in Texas for this suggestion!

K Links for Protex II

The Protex II manual specifies Globe ML links for use with their systems. But it was recently pointed out to us that Heiser had put out a bulletin allowing Globe K links to be used, also.

FlashPoints has been updated to allow the use of K links with Protex II systems. K links are shown with a K after the temperature in the drop down list (ex., 360-K) and the full description is shown on the Material List and the Requirements screen.

THANK YOU to Rob Harwood from BDR Ltd in Ontario, Canada for this suggestion!

Industrial Material List Change

KITCHEN INDUSTRIAL

System Materials

Item Number	Description	Flow	Qty
12854	Actuation Hose - (N2 - 1/4" x 16")		2
12790	Amerex Brass Gas Valve - Mech - 3/		1
16085	Bracket As'y, Agent Cylinder 3.75 gal.		2
12309	Corner Pulley		10
16557	Detection Tubing 25 ft		1
12328	Fusible Link - 360°F. ("K")		6
21369	Horn/Strobe Alarm 120 VAC		1
21481	Manual Pull Station (Recess or Surfa		1
13334	Model 3.75 Agent Cylinder, w/Dischar		2
18000	MRM II with Red Enclosure		1
09956	Nitrogen Cylinder - 15 in(3)		1
11982	Nozzle - Appliance, Plenum	6.0	6
16416	Nozzle - Duct	4.0	4
13729	Nozzle - Fryer, Griddle	4.0	2
14178	Nozzle - ZD Appliances and Four Bur	4.0	2
12524	SPDT Snap Action Swith w/ 18" Lead		1
16901	Swivel Adapter for 2.75 or 3.75 Agent		2
17515	Termination Kit - Link Detection - Incl		1

Total Flow Points: 18.0

System Materials

Item Number	Description	Qty
551654	17# ABC	2
551094	70# ABC	1
013708	EGVSO-100 Gas Valve, Elec, 1 Pipe	1
551200	MCH Control Head, Mech, No Local Actuation	1
551101	Nozzle - Duct Only (N-DCT)	1
551653	Nozzle - Horizontal Pit/Duct (NV-DP2)	1
551650	Nozzle - Overhead Work Area (NV-WA)	4
551651	Nozzle - Under Floor (NV-UF)	2
551074	RPS-M Remote Pull Station, Mech	1

A couple of years ago we received a request to add flowpoints next to the nozzles in the System Material List. At the time we added a column for flowpoints and the total at the bottom of the Material List. We let FlashPoints populate the list with whatever flowpoint values were in the database. We figured this would work for all drawings and thought nothing more about it.

However, it was recently pointed out to us that Industrial systems do not use flowpoints. We never worried about this before since FlashPoints just used a value of 0 for the flows. But evidently this has caused some confusion for some AHJs. So we have removed the references to flowpoints all together for Industrial systems.

While we were at it, we decided to take things a little further. We noticed that the description of nozzles was not consistent in FlashPoints. So we added "Nozzle - " to the front of each nozzle description. Then we changed the way the Material List was sorted so that the Material List is sorted alphabetically by Description. This groups the Nozzles together so the AHJ no longer has to play "Where's Waldo" to find the system nozzles. Hopefully, this will make plan reviews go a little bit smoother.

THANK YOU to Deano Owings from Summit Companies in Texas for this suggestion!

FlashPoints Referral Program

Don't forget to give your friends your FlashPoints referral code.

**When they get FlashPoints,
they will get 2 extra credits and you will get 2 credits, also!**

**If you don't have your FlashPoints referral code,
send an email to support@flash-soft.com and we will send it to you.**
